EDUCATION

Thapar Institute of Engineering and Technology, Patiala, India Aug 2022 – May 2026 (Expected)
Bachelor of Engineering in Electronics and Computer Engineering CGPA: 8.00 / 10

EXPERIENCE

Amazon ML Summer School Aug 2025 – Sept 2025
Amazon *Virtual*

- **Implemented** supervised, unsupervised and complex **machine learning algorithm** using a suite of **Python** **libraries** such as scikit-learn, NumPy, and Pandas.
- **Developed machine learning models** for diverse projects using advanced algorithm and tools, achieving **accuracy rates exceeding 95%**.

TECHNICAL SKILLS

Domains: Web Development, Machine Learning, Data Structures and Algorithms
Programming Languages: Python, C, C++, JavaScript, TypeScript, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Next.js, Express.js, Prisma, Tailwind CSS, Recoil, Numpy, Pandas, Turborepo
Databases: MongoDB, PostgreSQL, SQL
Tools & Platforms: Git, Docker, Vim, Postman, Cloudflare, AWS, Vercel, Visual Studio Code, Jupyter Notebook

PROJECTS

Wallet App — TypeScript, Next.js, PostgreSQL, Tailwind CSS, Node.js, Turborepo *GitHub*

- Engineered a secure full-stack digital wallet platform for users and merchants with **authentication** and **transaction history**.
- Integrated RESTful APIs simulating **banking transactions** for robust payment flow testing.
- Refactored database queries using Prisma ORM, cutting down the number of lines of code by 200+ and standardizing data access patterns throughout the application.

Real-Time Drawing App — Next.js, TypeScript, WebSockets, Tailwind CSS, Turborepo *GitHub*

- Created a collaborative whiteboard application with **real-time synchronization** for multiple users.
- Engineered real-time collaborative whiteboard application utilizing **WebSockets** to deliver instantaneous updates to 10+ concurrent users; achieved sub-300ms latency, resulting in a highly responsive user experience that boosted user satisfaction.

House Price Prediction — Python, FastAPI, TypeScript, React, Pandas, Scikit-Learn, Bolt *GitHub*

- Orchestrated the construction of a machine learning model to forecast Bangalore house prices, leveraging location, BHK, area, and bathrooms, enhancing prediction accuracy by 8% over existing models.
- Revamped **data cleaning and preprocessing** workflows, boosting model accuracy by 8% and reducing model training time by 20%.
- Built a **FastAPI** backend and **React** frontend, enabling users to input property details and get real-time predictions.
- Deployed the application on **AWS** for scalable and reliable access.

Food Delivery Website — React, Node.js, TypeScript, PostgreSQL, Tailwind CSS, Docker *GitHub*

- Developed a responsive food ordering platform with menu management and order tracking.
- Implemented **dynamic search and category filters** to enhance user experience.
- Utilized **Prisma ORM with caching** for high-performance data retrieval.

ACHIEVEMENTS

- Honed proficiency in **Data Structures and Algorithms** by solving **400+** LeetCode and TakeYouForward problems.
- Secured **3rd Runner-Up** in Google Rapid Code Challenge.
- Managed technical logistics for flagship events (Hack4Sustainability, Robowars, Circuit Relay) at **Saturnalia Techno Cultural Fest (2023–24)** with 500+ participants and 50+ judges.
- Directed logistics and marketing for events (Zancudo, HackOWASP 5) at the **OWASP Student Chapter (2022–23)** and implemented a referral program that boosted first-time participant acquisition by 30%.
